Evidenced Based Treatment-Training Staff & Increasing Family Involvement to Improve Treatment Outcomes

> Samantha Mishne, LISW-S, LICDC-CS Bellefaire JCB

Goals

- Participants will learn how the evidenced based treatment model of dialectical behavioral therapy was selected and what it can target
- Participants will learn how staff were trained and how adherence to DBT is maintained
- Participants will learn the outcomes of implementing an evidenced based treatment model within a 30 bed residential treatment center

Adherent vs Informed

- Individual DBT therapy- Adolescent 6 month/Adult 1 year
- DBT skills group
- Consultation team
- Phone coaching

BPD Characteristics
 Emotion Dysregulation

Emotional lability & angry outbursts

- Interpersonal Dysregulation
 Unstable relationships & effort to avoid loss
- Behavioral Dysregulation
 Suicide threats, parasuicidal behaviors & impulsive behaviors
- Cognitive Dysregulation
 Poor problem solving, paranoid ideation & black & White thinking
- Self Dysregulation
 Identity confusion, dissociation & sense of emptiness

Where To Start?

- Is there a need for DBT / Evidenced based treatment at your agency?
- Can I find at least one other person willing to form a DBT Team?
- Who will gain from a DBT program and who will lose?

Assessment

- 2 ½ hour unstructured day treatment group
- One other intensively trained DBT therapist
- Gains-providing evidenced based treatment to young people that would not otherwise be able to access treatment & increase in structure. Loseunstructured crafting

How To Train Staff

- Send staff to DBT intensive training-5 day training and return to their organization to implement and return for another 5 day training-Average cost 2,800 not including hotel and flight. Even a 3 Day PESI training would cost \$399 per staff
- Train existing staff and new staff
- What level of training does staff need

Skills Training

- Have we developed ways to solve staff training needs?
- Have we assessed and challenged erroneous beliefs about DBT, suicidal behavior and/or adolescents?

DBT Assumptions

- People are doing the best they can
- People want to improve
- People need to do better, try harder and be more motivated to change
- People may not have caused all of their own problems, but they have to solve them anyway
- The lives of suicidal individuals are unbearable as they are currently being lived
- People must learn new behaviors in all relevant contexts
- People cannot fail in therapy
- Therapist treating suicidal clients need support

Introducing the Treatment Format

- DBT is not a suicide prevention program, but rather a life enhancement program
- DBT is supportive of clients' attempts to improve the quality of their lives
- DBT is behavioral
- DBT is collaborative
- DBT employs telephone consultation
- DBT is a team treatment

Hierarchy of DBT Stages

- Pretreatment Stage-Orientation and Commitment to Treatment
- Stage I
 - Target I Decreasing life threatening behaviors
 - Target II Decreasing therapy-interfering behaviors
 - Target III Decreasing quality of life interfering behaviors
 - Target IV Increasing behavioral skills

Strategies for Obtaining Commitment

- Evaluating pros and cons
- Playing devil's advocate
- Foot in the door technique
- Door in the face
- Highlighting freedom to choose and absence of alternatives
- Cheerleading

Commitment Agreement for DBT Treatment

- I commit to staying in individual therapy and skills training including the multifamily skills group for the time recommended. If your family cannot participate in the multifamily skills group please state why: ______.
- 2. I commit to addressing urges to leave therapy or refuse treatment during individual sessions, skills group, TBS, family therapy or psychiatry and agree to not end sessions early.
- 3. I understand that missing four consecutive sessions is considered dropping out of therapy. Should this happen, I cannot return to therapy until the end of the agreed upon period. At that time, returning to therapy will be negotiated rather than guaranteed.
- 4. I agree to work on any problems that will interfere with therapy.
- 5. I agree to complete diary cards daily and behavior chains as needed.
- 6. I agree to utilize skills coaching to support skills generalization, reporting good news, and repairing relationships to ensure I am practicing implementing new skills in all environments.
- 7. I agree to keep all appointments.
- 8. I consent for my therapist to discuss my treatment, issues, and progress with a consultation team of trained DBT professionals to increase their adherence to DBT.
- 9. I agree that I will utilize resources (skills, supports, safety plan, etc.) to avoid engaging in self-harming behavior (both with and without intention to die). I understand that if I do not reach out to my therapist or cottage staff for skills coaching prior to self-harming or engaging in life threatening behavior I will receive a 72, will complete a behavior chain focusing on how to change the links in the chain and will need to correct and repair to myself and the treatment team.
- 10. Lastly, I understand that committing to these guidelines may be difficult at times, and yet I understand that these guidelines are in place for DBT to be most effective for me.

Client Signature

Therapist Signature

Parent Signature

Date

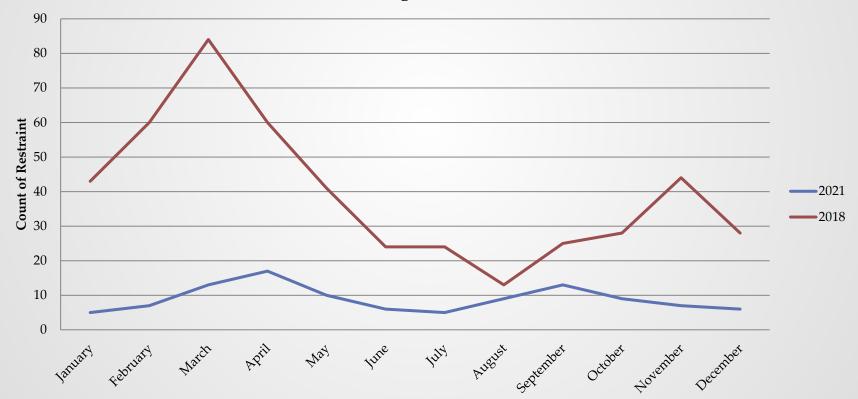

What Has Changed After a Year

- Everyone is speaking the same language including parents-defined skill set
- Staff are less judgmental
- Families are not just getting family therapy but are also learning skills
- Shorter stays 2-4 months vs. 6-8
- Increased communication to support implementation of DBT –Asking staff for behavior chains and dairy cards
- Decrease in restraints

Restraints 2018 Vs. 2021

Restraints Over Time

Cottages 10 & 12

Therapist Consultation Agreement

- Dialectical Agreement
 - There is no absolute truth
- Consultation to the patient
 - Teach patient to handle others on the team Vs. reinforcing clients' tendencies to elicit help
- Consistency
 - This agreement helps team members accept variations within other members
- Observing limits
 - Therapist agree to their own limits without judging others
- Phenomenological empathy
- Fallibility agreement
- Stretch Limits
- Anti-Racism
 - We agree to provide functional validation to racially marginalized clients using our own privilege and power to change racial inequalities

GENERAL WORKSHEET 2 (p. 2 of 4)

LINKS IN THE CHAIN OF EVENTS Cognitions/Thoughts, Feelings	: Behaviors (<u>A</u> ctions, <u>B</u> ody sensations,) and <u>E</u> vents (in the environment)
Possible Types of Links	
A. Actions	
B. Body sensations	OS CO
C. Cognitions/thoughts	
E. Events	
F. <u>F</u> eelings	
 List the <i>chain of events</i> (specific behaviors and environmental events that actually did happen). Use the ABC-EF list above. 	6. List new, more <i>skillful</i> behaviors to replace ineffective behaviors. Use the ABC-EF list.
1st	1st
2nd	2nd
3rd	3rd
4th	4th
5th	5th
6th	6th
7th	7th
8th	8th
9th	9th

(continued on next page)

Chain Analysis of Problem Behavior

What exactly is the major PROBLEM BEHAVIOR that I am analyzing?

What PROMPTING EVENT in the environment started me on the Chain to my problem behavior? Start day

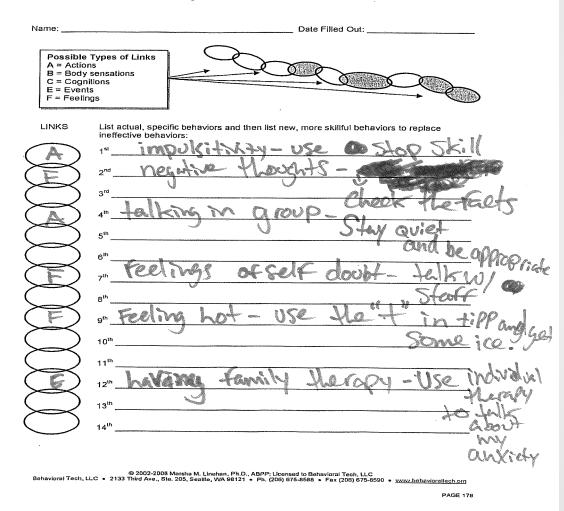

was anxious about

What things in myself and my environment made me VULNERABLE? Start day: negative

What We Still Need To Accomplish

- Train all staff-line staff, intake, maintenance, nursing...
- Increase utilization of phone coaching of line staff-lead
 to a decrease in restrains
- Progress notes/treatment plans
- Motivation and commitment –running two different tracks?
- Continuity of care following discharge
- Educate community referrals about the model
- Ongoing training and adherence evaluation
- Increasing family involvement-focus on family therapy vs. individual, weekly attendance multifamily skills group and weekly visits
- More research around effectiveness
